

Guidelines for case studies

Dear author,

Your case study should roughly adhere to the following structure:

0. Abstract and keywords
1. Introduction
2. Characterisation of disease syndroms / medical conditions (with reference to the four-level structure/Wesensglieder and/or the threefold human being/funktionelle 3-Gliederung)
3. Diagnosis
4. Decision for medical and/or non-medical treatment
5. Evolution of the therapy
6. Evaluation of the effectiveness of the therapy
7. Discussion including ethical reasoning
8. Literature

Thank you very much.
